Product Features:

Mini magnetic spot light, aluminum precision machining molding, surface electrostatic spraying process.

The integrated heat dissipation structure enables LED chip to dissipate heat rapidly, ensuring the average life of the light source can reach 50,000 hours. Can be divided to increase or decrease the number of lamp, choose the light color to meet different application environment, HQ LED cold light source, no radiation, no strobe, for the spectrum does not contain red, ultraviolet light, protect the subject.

Suitable for jewelry, jewelry, clocks, antiques and other display cabinets, display small space as the key lighting.

Product Features:

Zoom spotlight for use in track lighting systems. The unique zoom patent makes it possible to vary the beam angel between 15-and 60 degrees making this model highly versatile, The Zoom spot is available in 2700 to 6000 Kelvin and is made from robust die-cast aluminum. Choose between on/off, phase cut and DALI dimming.

They are able to be used in plenty of applications such as retail stores, art galleries, residential areas, schools, museum, offices, hospitality and healthcare, etc.

One of unique advantage for such best rated Smarter track lighting lies in its flexible installations covering track-mounted.

Made of high quality LED light source, exquisite appearance, smooth texture, precision optical design, create a fruity, full incomparable perfect light type. Spectrum contains no red, uv, protection is according to the content, do not contain harmful substances mercury, caring human body health, protect the environment. Diversified product range, can choose suitable products according to the different environmental needs.

Product Features:

Profession design for jewelry lighting
Use this light in glass display showcases and jewelry showcase is perfect.
The Post Spot is a simple, easy to install product with plug and play connection to the power Supply and will illuminate your displays for years to come.
Showcase lights are used to light up products kept in a display showcase in a showroom
These lights are placed very close to the product and point directly at the then thus, and they light up them in the best possible manner.

Product Features:

Mini magnetic spot light, aluminum precision machining molding, surface electrostatic spraying process.

The integrated heat dissipation structure enables LED chip to dissipate heat rapidly, ensuring the average life of the light source can reach 50,000 hours. Can be divided to increase or decrease the number of lamp, choose the light color to meet different application environment, HQ LED cold light source, no radiation, no strobe, for the spectrum does not contain red, ultraviolet light, protect the subject.

Suitable for jewelry, jewelry, clocks, antiques and other display cabinets, display small space as the key lighting.

STANDARDS & COMPLIANCES

Product Features:

Zoom spotlight for use in track lighting systems. The unique zoom patent makes it possible to vary the beam angel between 15-and 60 degrees making this model highly versatile, The Zoom spot is available in 2700 to 6000 Kelvin and is made from robust die-cast aluminum. Choose between on/off, phase cut and DALI dimming.

They are able to be used in plenty of applications such as retail stores, art galleries, residential areas, schools, museum, offices, hospitality and healthcare, etc.

One of unique advantage for such best rated Smarter track lighting lies in its flexible installations covering track-mounted.
